Syllabus for CSE031-01: Computer Organization

Fall 2017
Instructor: Chi Yan Leung

Designation:	Computer Organization
Catalog Description:	Provides students with an overview of the diverse field of computer science and engineering. Also provides an in-depth analysis of several key inventions in the field that have been instrumental in advancing CSE and driving worldwide technical growth.
Text Books and Other Required Materials:	• Computer Organization and Design from zyBooks 1. Sign in or create an account at learn.zybooks.com 2. Enter zyBook code: UCMERCEDCSE31LeungFall2017 3. Click 'Subscribe' Each student must subscribe his/her own copy with UC Merced email address. Participation grade will be partly evaluated based on the activities within the subscription account. • C Programming Language, 2/E by Brian W. Kernighan and Dennis Ritchie (ISBN 13: 978 0131103627)
Course Objectives/ Student Learning Outcomes:	Students will learn all the big ideas underpinning the design of modern computers starting from binary numbers representing integers, floating points, data structures and even program code. They will be exposed to C programming language and how each high level construct translates to intermediate language called Assembly before finally getting down to machine language that modern computers executes. Exact steps required for execution instructions in the CPU will be detailed along with the necessary devices starting from CMOS transistors to gate-level logic using Finite State Machines. Students will be able to: 1. Describe how data is represented in computer memory. 2. Demonstrate how fundamental high-level programming constructs are implemented at the machine-language level. 3. Write assembly language program that can input, process and output results. 4. Demonstrate an understanding of basic computer architecture 5. Describe how data are represented in the computer, including floating point numbers and arrays. 6. Describe how synchronous digital systems are created using Digital Logic Gates.
Program Learning Outcomes:	
Prerequisites by Topic:	
Course Policies:	
Academic Dishonesty Statement:	a. Each student in this course is expected to abide by the University of California, Merced's Academic Honesty Policy. Any work submitted by a student in this

Designation:	Computer Organization
	course for academic credit will be the student's own work. b. You are encouraged to study together and to discuss information and concepts covered in lecture and the sections with other students. You can give "consulting" help to or receive "consulting" help from such students. However, this permissible cooperation should never involve one student having possession of a copy of all or part of work done by someone else, in the form of an e mail, an e mail attachment file, a diskette, or a hard copy. Should copying occur, both the student who copied work from another student and the student who gave material to be copied will both automatically receive a zero for the assignment. Penalty for violation of this Policy can also be extended to include failure of the course and University disciplinary action. c. During examinations, you must do your own work. Talking or discussion is not permitted during the examinations, nor may you compare papers, copy from others, or collaborate in any way. Any collaborative behavior during the examinations will result in failure of the exam, and may lead to failure of the course and University disciplinary action.
Disability Statement:	Accommodations for Students with Disabilities: The University of California Merced is committed to ensuring equal academic opportunities and inclusion for students with disabilities based on the principles of independent living, accessible universal design and diversity. I am available to discuss appropriate academic accommodations that may be required for student with disabilities. Requests for academic accommodations are to be made during the first three weeks of the semester, except for unusual circumstances. Students are encouraged to register with Disability Services Center to verify their eligibility for appropriate accommodations.
Topics:	• Number systems and math: binary, hex, octal • C, I/O, structs, pointers, memory management • Pointer arithmetic, arrays, C strings • Debugging with GDB • Compiling / Linking • Machine Organization • Memory Allocation and Management • CPU Design
Class/laboratory Schedule:	Lecture: MW 9:00-10:15am, SSB 120: Lab:R: 1:30-4:20pm, SCIENG 138; F: 4:30-7:20pm, SCIENG 100
Midterm/Final Exam Schedule:	This schedule is subject to change, but is tentatively set as follows: Midterm : Week of October 16, 2017 (in class) Final : December 12, 2017 (SSB 120)
Course Calendar:	
Professional Component:	
Assessment/Grading Policy:	• 20% Midterm • 25% Final • 12% Participation • 10% Homework • 13% Project • 20% Lab
Coordinator:	Chi Yan (Daniel) Leung
Contact Information:	Email: cleung3@ucmerced.edu I will try to answer your emails within 48 hours. However, I cannot answer email after 5:00 p.m. or on weekends. Please plan accordingly.

Designation:	Computer Organization
Office Hours:	T/R 10:00am-12:00pm (AOA 126) W: 1:00pm-2:30pm (AOA 126) or by appointment
